

ComplianceOS

Your All-in-One Trade Compliance Co-Pilot

Stop worrying about regulations. Start growing your exports.

Product Walkthrough & Getting Started Guide · February 2026 · v1.0

Why Does ComplianceOS Exist?

International trade is complicated. It shouldn't be.

If you're an exporter or MSME, you already know the pain:

Dozens of regulations to track across EU, US, UK, UAE, Japan, Australia — each with their own rules

Changing deadlines for CBAM carbon reporting, Digital Product Passports, EUDR deforestation requirements

Mountains of paperwork — IEC certificates, GST/LUT, phytosanitary certificates, certificates of origin

Missed savings from Free Trade Agreements and schemes like RoDTEP and PLI

Shipments stuck at customs because one label was wrong or one document was missing

ComplianceOS solves all of this — turning trade compliance into a simple, guided process

What Does ComplianceOS Handle?

Risk Analysis

Know your compliance risk score *before* you ship

Smart Checklists

Auto-generated, country-specific document checklists

Regulatory Alerts

Real-time notifications about rules, deadlines, and changes

FTA & Scheme Savings

Discover trade agreements and government schemes that save you money

Shipment Tracking

Track every shipment's compliance status from start to finish

Label Validation

Verify product labels meet destination-country rules before printing

Why Should You Try ComplianceOS?

⚠ THE RISK IS REAL

One missed deadline or one wrong label can cost you weeks of delay and lakhs in penalties.

✓ **Save hours every week** — No more checking 20 different government websites

✓ **Prevent shipment delays** — Catch missing documents before they become problems

✓ **Save money on duties** — Automatically discover FTA benefits and export schemes

✓ **Stay ahead of regulations** — Get alerts 90 days before deadlines hit

✓ **Go paperless** — Track everything digitally, no more spreadsheets

✓ **Sleep better** — Know your compliance is handled by a system that never forgets

Step-by-Step Guide

Let's walk through everything together — no prior experience needed!

Step 1: Create Your Account

The very first thing you need to do is create a free account. It takes less than 30 seconds.

ComplianceOS
Sign in to your account

Email

Password

Sign In

Don't have an account? [Sign Up](#)

The ComplianceOS Sign-In page — enter your email and password to access your dashboard

How to get started:

- 1 Open ComplianceOS in your web browser
- 2 Click **"Sign Up"** to create a new account
- 3 Enter your **Full Name, Email, and Password**
- 4 Click the orange **"Create Account"** button
- 5 Check your email for a **confirmation link** and click it
- 6 Come back and **Sign In** with your new credentials

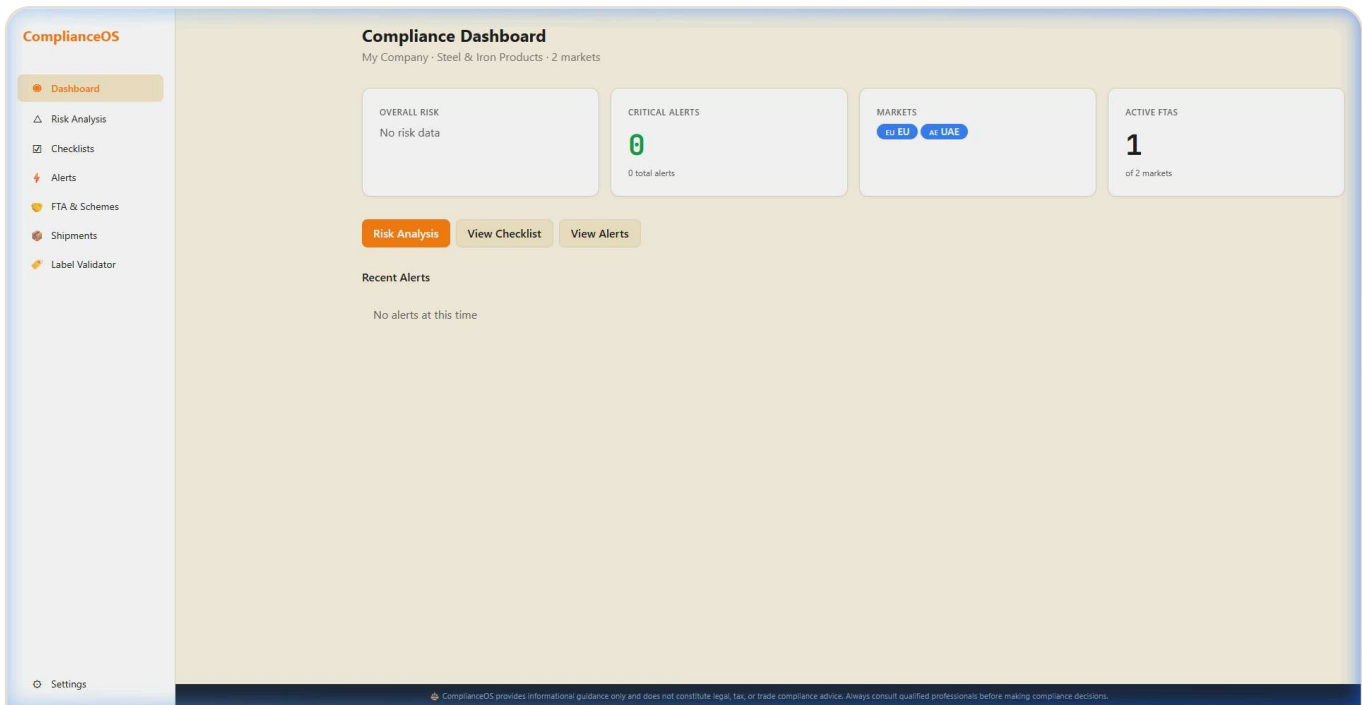

TIP

Already have an account? Simply enter your email and password on the Sign In page and click the orange button. That's it — you're in!

Step 2: Your Compliance Dashboard

After signing in, you'll land on your **Dashboard** — your command center for all trade compliance.

The Compliance Dashboard — your command center showing risk overview, alerts, markets, and FTA coverage at a glance

What each section tells you:

SECTION	WHAT IT MEANS	WHY IT MATTERS
Overall Risk	Your compliance health score (0–100)	Green = safe · Orange = pay attention · Red = act now!
Critical Alerts	Urgent regulatory changes needing attention	Click to see approaching deadlines
Markets	Countries you export to with their status	See which markets need work at a glance
Active FTAs	Trade agreements applying to your products	Can save you significant import duty!
Quick Actions	One-click buttons for key features	Fast access to Risk Analysis, Checklists, and Alerts
Recent Alerts	Latest regulatory updates	Stay informed without checking government websites

NAVIGATION

Look at the

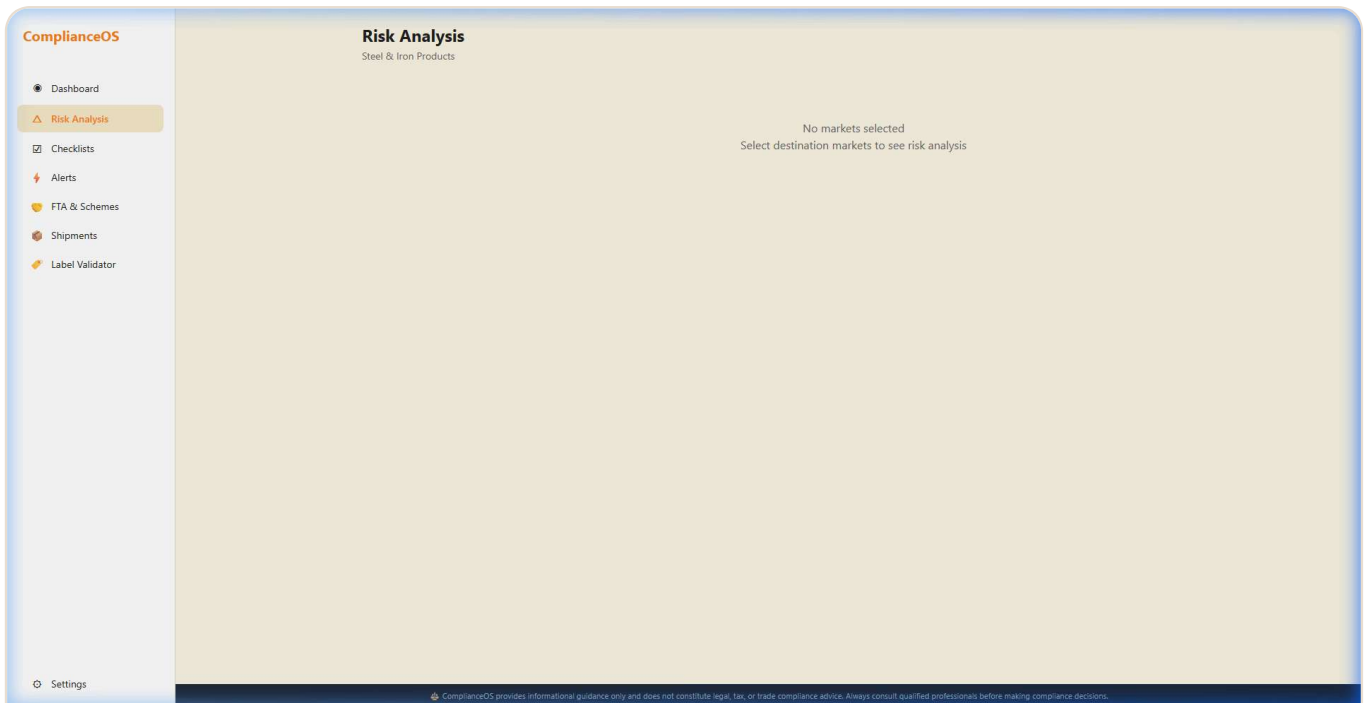

SIDEBAR ON THE LEFT

— this is how you move between different sections of ComplianceOS. We'll explore each one now.

Step 3: Risk Analysis

Click **“Risk Analysis”** in the sidebar — see exactly what risks exist for your products and markets.

Risk Analysis page — view risk factors and recommendations for each target market

How to use it:

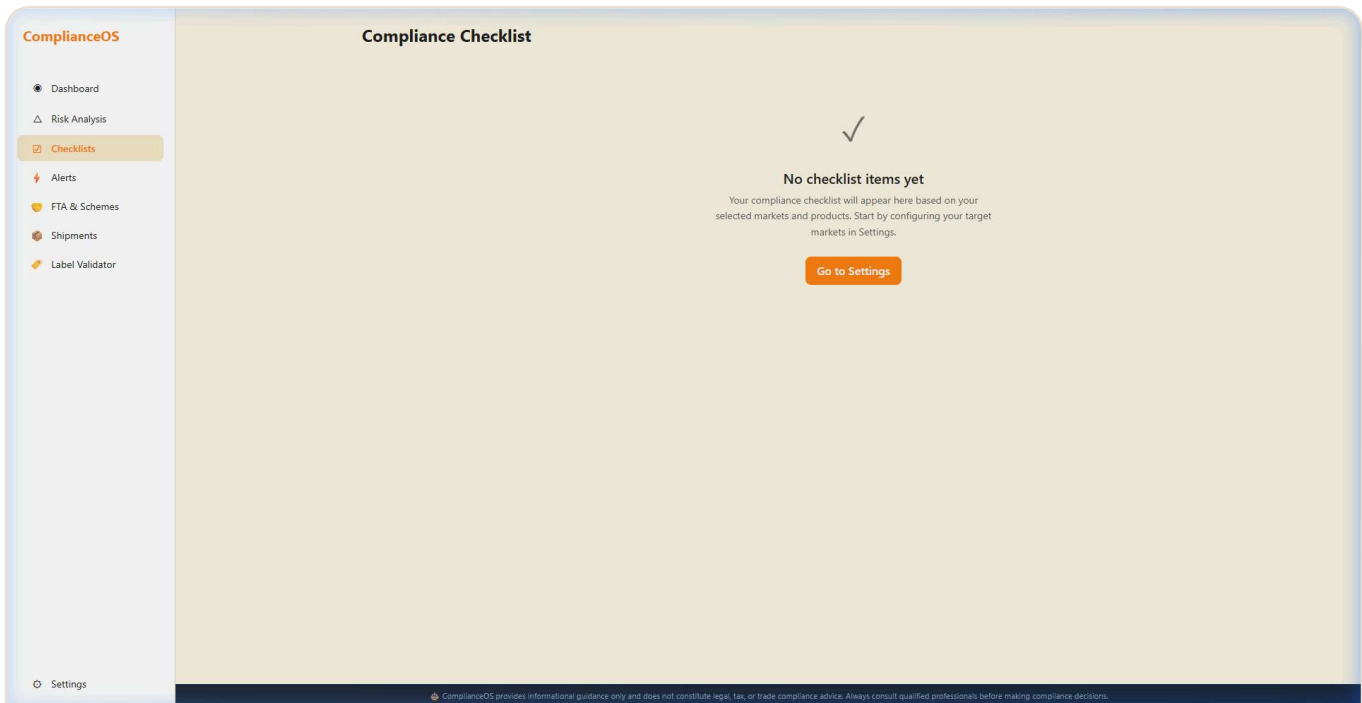

- 1 Your product and selected markets are shown at the top
- 2 The **Risk Gauge** shows your overall score for each country
- 3 Below, **Risk Factors** show what specific regulations affect you
- 4 Click any factor to see **detailed recommendations**
- 5 Compare different markets to understand where your risks are highest

RISK FACTOR	SEVERITY	WHAT IT MEANS
CBAM Carbon Reporting	HIGH	EU requires carbon emission data for steel, aluminum, cement
ESG Scope 3 Disclosure	MEDIUM	Some markets require supply chain sustainability reporting
Active FTA Benefits	POSITIVE	A trade agreement that <i>reduces</i> your import duties!

Step 4: Compliance Checklists

Click **"Checklists"** — your auto-generated to-do list for every shipment. Never miss a document again.

Interactive compliance checklists with progress tracking — organized by document category

How to use it:

- 1 Choose your **target market** using the country tabs at the top
- 2 See the **progress bar** showing how many items you've completed
- 3 Items are organised into categories: Documentation, Certifications, Indian Compliance
- 4 **Click any item** to mark it as complete ✓
- 5 Watch the progress bar fill up as you check off items!

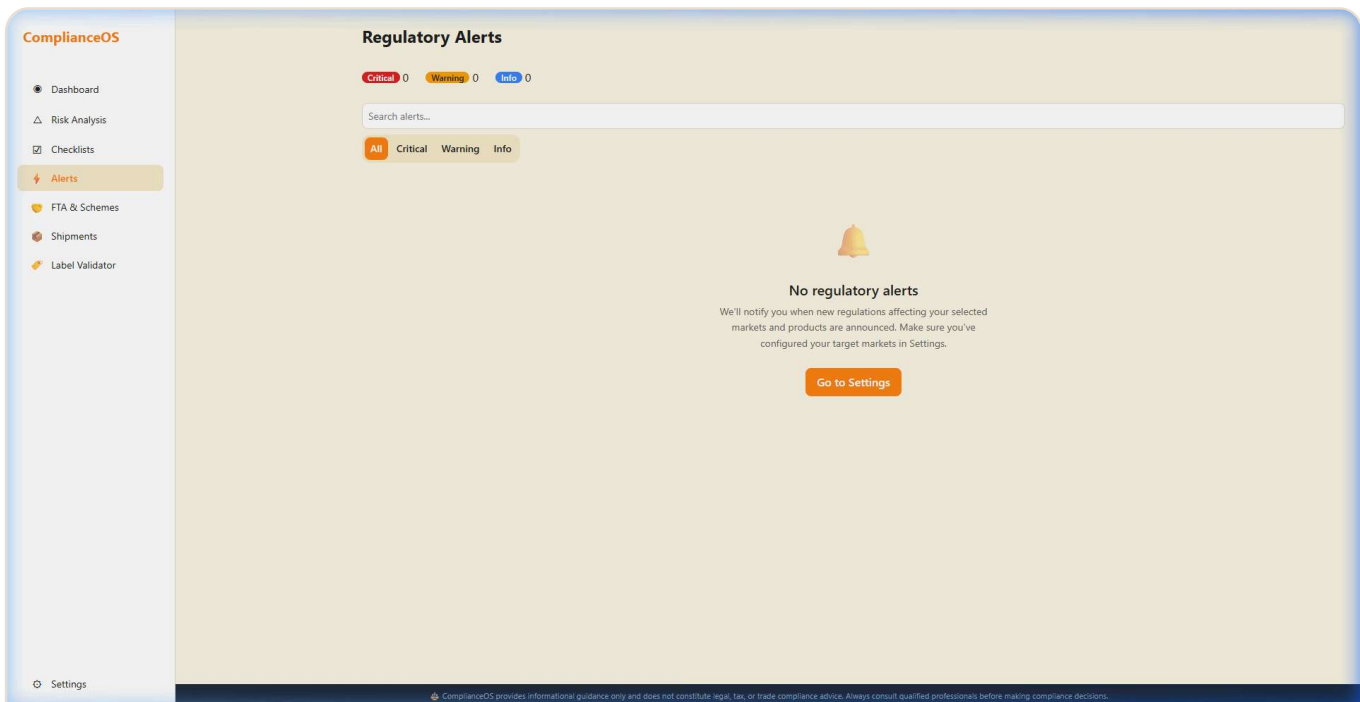

SMART CHECKLISTS

The checklist adapts automatically based on your product and destination. Exporting food to the EU? It includes FSSAI and phytosanitary certificates. Exporting chemicals to Japan? Different safety certs appear. ComplianceOS remembers so you don't have to.

Step 5: Regulatory Alerts

Click **"Alerts"** — your early warning system for regulatory changes.

Regulatory alerts filtered by severity — Critical, Warning, and Info updates

How to use it:

- 1 Use the **filter buttons** at the top — All, Critical, Warning, or Info
- 2 Each alert shows **what's happening**, **how urgent** it is, and the **deadline**
- 3 Click any alert for **detailed information** and regulation citations
- 4 Each alert includes **clear action items** — exactly what you need to do

ALERT	SEVERITY	ACTION REQUIRED
EU Digital Product Passport	CRITICAL	Register products in EU database before deadline
CBAM Carbon Reporting Q1	WARNING	Submit quarterly emission data by filing date
EUDR Deforestation Rules	CRITICAL	Prepare supply chain documentation
India-UK FTA Negotiations	INFO	Monitor for updates — potential new trade benefits

 IMPORTANT

Never ignore Critical alerts! These have tight deadlines and failing to comply can result in shipments being held, heavy fines, or export bans.

Step 6: FTA & Schemes — Save Money

Click **"FTA & Schemes"** — discover Free Trade Agreements and export schemes that reduce your duties.

FTA & Schemes analysis — see active trade agreements and potential duty savings for your products

What you'll find here:

- 1 **FTA Cards** — Agreement name, status (Active / Under Negotiation), and duty savings
- 2 **Tariff Comparison** — Standard rates vs. preferential rates side by side
- 3 **Indian Export Schemes** — Government incentives like RoDTEP, PLI, Advance Authorization
- 4 **Savings Calculator** — Potential duty savings for your specific product routes

 DID YOU KNOW?

Many exporters miss out on lakhs in duty savings because they don't file for preferential tariff rates under active FTAs. ComplianceOS identifies these automatically!

Step 7: Shipment Tracking

Click **“Shipments”** — create and track individual shipments with per-shipment compliance scores.

Shipment tracking — each shipment shows product, destination, date, status, and compliance score

How to use it:

- 1 Click the orange **“+ New Shipment”** button at the top right
- 2 Enter **Shipment Name, Product, Destination, and Date**
- 3 Click **“Create Shipment”** — a checklist and risk score are auto-generated
- 4 Monitor the **compliance score** — it updates as you check off items
- 5 Click the dropdown arrow on any shipment for full details

 COMPLIANCE SCORE GUIDE

A score below 50% means the shipment is NOT ready. Complete remaining checklist items before shipping to avoid costly delays at customs.

Step 8: Label Validator

Click **"Label Validator"** — incorrect labeling is one of the **top reasons** shipments get held at customs.

ComplianceOS provides informational guidance only and does not constitute legal, tax, or trade compliance advice. Always consult qualified professionals before making compliance decisions.

Label Validator — check your product labels against destination-country requirements rule by rule

How to use it:

- 1 Select your **Product Category** from the dropdown
- 2 Choose the **Destination Country** from the tabs (EU, US, UK, UAE, Japan, Australia)
- 3 ComplianceOS loads **exact labeling rules** — organized by Language, Origin, Identification, Environmental
- 4 **Toggle each requirement** to check compliance — watch the score update in real-time
- 5 Click the dropdown on any rule to see the **specific regulation** it comes from
- 6 Use **“Mark All Compliant”** or **“Reset All”** for fast management

PRO TIP

Try switching countries! Requirements change entirely — EU requires official language labeling while UAE requires Arabic text and Halal certification. Always validate BEFORE printing.

Step 9: Settings & Configuration

Click **"Settings"** at the bottom of the sidebar — configure ComplianceOS to match your business.

API Keys

ComplianceOS provides informational guidance only and does not constitute legal, tax, or trade compliance advice. Always consult qualified professionals before making compliance decisions.

Settings — configure your company profile, product categories, target markets, and API integrations

What to configure:

SETTING	WHAT TO ENTER	WHY IT MATTERS
Company Profile	Name, size, IEC number	Risk scores adjust based on company size
Product Categories	Steel, Textiles, Food, Chemicals, etc.	Determines which regulations apply to you
Target Markets	EU, US, UK, UAE, Japan, Australia	Generates country-specific checklists and alerts
API Keys	External data source keys	Advanced customs system integration

QUICK NOTE

You can change settings anytime. As your business grows into new markets, update your profile and ComplianceOS will immediately recalculate everything.

Frequently Asked Questions

Do I need to be a compliance expert to use ComplianceOS?

Not at all! ComplianceOS is designed for exporters of all sizes. The platform explains every regulation in plain language and tells you exactly what to do.

Which countries does ComplianceOS support?

We currently cover **EU, US, UK, UAE, Japan, and Australia** — the major export destinations. We're constantly expanding.

How does ComplianceOS know what regulations apply to me?

Based on your product categories and target markets in Settings, ComplianceOS automatically maps the applicable regulations, generates relevant checklists, and surfaces the right alerts.

Can multiple team members use ComplianceOS?

Yes! Each team member can create their own account and collaborate on compliance together.

What if a regulation changes?

ComplianceOS monitors changes in real-time. You'll receive an alert the moment something changes that affects your exports.

Is my data secure?

Yes. ComplianceOS uses enterprise-grade security with encrypted data storage and secure authentication.

"Trade should be about growing your business — not fighting paperwork.

At ComplianceOS, we've built everything you need to navigate the complex world of international trade compliance. From risk analysis to label validation, from regulatory alerts to duty savings — we've got you covered.

*And if you ever feel stuck, remember: **we're here to help with everything we can to make trade easy.***

Because when trade becomes simpler, businesses thrive, economies grow, and the world gets a little more connected."
