

Business Model Canvas — Version 2.0

Ben Finserv | Trade Finance Structuring Platform

1. Customer Segments

Primary Customers (Revenue Generating)

SME Exporters

- Indian exporters with confirmed international orders
- Firms facing working capital constraints between shipment and payment
- Exporters scaling into new markets with limited bank credit lines

Export-Oriented SMEs Without Bank Limits

- Businesses with realized export turnover but **no structured trade finance facility**

CFOs / Treasury Heads of Export Firms

- Responsible for managing cash flow cycles
 - Seeking structured funding for export orders
-

Secondary Customers (Strategic)

Importers needing supplier-backed financing structures

High-growth SMEs expanding global trade operations

2. Value Proposition

“We convert confirmed trade orders into working capital — fast, structured, and compliant.”

Ben Finserv enables exporters to unlock liquidity from **real trade transactions**, helping them fulfill larger orders without waiting for buyer payments.

Core Value

- Funding aligned to **real export transactions**
- Faster structuring compared to traditional bank processes
- Access to **multiple lenders instead of a single bank**
- Reduced operational friction in documentation and compliance
- Finance structures that scale with trade growth

Instruments Structured

- Invoice discounting
 - Export receivable financing
 - Pre-shipment finance
 - Purchase-order financing
 - Buyer-backed trade structures
-

3. Channels

Founder-Led Channels

- LinkedIn thought leadership
- Direct exporter outreach
- Industry networking

Partner Channels

- Referrals from CAs and trade consultants
- Bank relationship managers
- Logistics and freight forwarders
- Export ecosystem advisors

Education Channels

- Webinars on export finance
 - Export working capital workshops
 - Trade finance insights and whitepapers
-

4. Customer Relationships

Advisory-Led Model

The platform operates as a **trusted deal structuring partner**, not just a referral intermediary.

Relationship model includes:

- High-trust advisory engagement
- Deal-by-deal structuring support
- Long-term partnerships with repeat exporters
- Ongoing trade finance education for clients

Many exporters return for **multiple funding cycles per year**, creating repeat business.

5. Key Activities

Core Activities

- Structuring export finance transactions
- Matching exporters with suitable lenders
- Risk assessment and transaction analysis
- Documentation coordination
- Compliance alignment

Transaction Management

- Stakeholder coordination between exporters, lenders, and logistics partners
- Buyer verification and transaction validation
- Ensuring smooth funding execution

Market Development

- Building lender networks
 - Export ecosystem partnerships
 - Thought leadership in trade finance
-

6. Key Resources

This is the **strategic moat of the platform**.

Institutional Network

- Relationships with banks
- NBFC trade finance desks
- fintech trade finance lenders

Structuring Expertise

- Knowledge of trade finance instruments
- Ability to structure deals around real export transactions
- Understanding of documentation and compliance frameworks

Ecosystem Relationships

- Chartered accountants
- logistics companies
- export consultants
- cross-border trade advisors

Technology Infrastructure

- Deal management systems
- communication and workflow tools
- documentation management systems

Market Intelligence

- buyer risk insights
- country risk awareness
- export sector knowledge

7. Key Partners

Ben Finserv operates as an **ecosystem orchestrator**.

Key partners include:

Financial Partners

- Banks
- NBFCs
- fintech trade finance platforms
- invoice discounting platforms

Trade Ecosystem Partners

- Freight forwarders
- logistics companies
- export consultants
- chartered accountants

Risk & Credit Ecosystem

- Export credit agencies
- credit intelligence providers
- compliance specialists

These partners enable **deal execution and risk management**.

8. Revenue Streams

The platform operates through **three primary revenue models**.

1. Facilitation / Success Fees (Primary)

Charged when financing is successfully arranged.

Typical structure:

- percentage of funded value
 - transaction-based
-

2. Advisory Fees

Charged for:

- trade finance structuring
 - export finance readiness
 - deal preparation
-

3. Retainers for Repeat Exporters

For exporters with **multiple funding cycles**, Ben Finserv may provide ongoing structuring support via:

- monthly retainers
 - structured advisory engagements
-

4. Partner Commissions

Revenue sharing from certain lender partnerships.

9. Cost Structure

The cost structure combines **fixed infrastructure costs** and **variable deal costs**.

Fixed Costs

- core structuring team
 - founder-led advisory time
 - CRM and workflow tools
 - technology and digital infrastructure
 - compliance and legal framework
-

Variable Costs

- deal-specific compliance checks
- buyer verification and due diligence
- partner coordination
- documentation management
- transaction execution time

These costs scale with **deal volume and complexity**.

Strategic Positioning of Ben Finserv

Ben Finserv positions itself as a **trade finance structuring platform**, bridging the gap between exporters and lenders.

Rather than acting as a traditional lender, the platform focuses on:

- structuring trade transactions
- orchestrating multiple stakeholders
- enabling exporters to unlock liquidity from confirmed orders

This **ecosystem-driven model** allows exporters to access capital **without relying on a single banking relationship**.

One-Page Business Model Canvas

Ben Finserv – Export Growth & Trade Finance Orchestrator

Customer Segments

- Indian MSME Exporters (₹1–10 Cr turnover)
 - Exporters with confirmed overseas orders but cash-flow gaps
 - Exporters selling on open account / partial advance terms
 - Growth-stage exporters struggling with repeat buyers & funding confidence
-

Value Propositions

- **Order Fulfilment Certainty:** Accept global orders without cash-flow anxiety
- **Buyer-Led Financing:** Funding based on buyer credibility, not exporter balance sheet

- **Single-Window Execution:** Finance + risk + structuring handled end-to-end
 - **Growth Enablement:** Not just money—clarity, confidence, and continuity
-

Channels

- LinkedIn (Founder-led content & storytelling)
 - Referrals from exporters, CAs, consultants
 - Exporter cohorts & closed communities
 - Direct advisory conversations (high-trust sales)
-

Customer Relationships

- High-touch onboarding
 - Deal-by-deal advisory
 - Long-term partnership mindset
 - Cohort-based peer learning & mentoring
-

Revenue Streams

- Order-based success fees (EOFaaS model)
 - Subscription / membership (Exporter Cohort)
 - Advisory & structuring fees
 - Platform access (future buyer-finance intelligence layer)
-

Key Activities

- Buyer credit assessment & risk analysis
 - Structuring reverse financing solutions
 - Coordinating banks, NBFCs & alternative financiers
 - Cash-flow diagnostics & trade cycle optimization
 - Exporter education & decision support
-

Key Resources

- Founder expertise (trade finance, risk, sales, strategy)
 - Buyer & financier network
 - Reverse Financing Method IP
 - Trust, credibility & storytelling-led brand
-

Key Partnerships

- Banks & NBFCs
 - Alternative trade finance providers
 - Export consultants & CAs
 - Buyer intelligence & credit data sources
-

Cost Structure

- Relationship management
 - Due diligence & deal structuring
 - Platform / tools (lightweight initially)
 - Marketing & content creation
 - Compliance & documentation support
-

Positioning Summary

Ben Finserv doesn't sell loans.

We help exporters fulfill global orders with confidence.

Founder Story:

My mission is simple:

India is aiming for a **\$2 trillion export target by 2030.**

To ensure small and mid-sized exporters are not left behind just because cash flow couldn't keep up with ambition.

Most Indian exporters don't fail because they lack buyers.

They fail because **cash flow collapses at the exact moment growth knocks on the door.**

After 20+ years across sales, finance, and international trade, I kept seeing the same story repeat itself:

An exporter gets a confirmed overseas order.

The buyer asks for open credit or partial advance.

Banks ask for collateral, history, comfort.

And the exporter is forced to choose between **risk or rejection.**

That's when I realized something important:

The problem isn't lack of finance.

The problem is who the system is built to trust.

So I built what I call the **Reverse Financing Method.**

Instead of asking,

"Is the exporter strong enough to borrow?"

I ask,

"Is the buyer credible enough to fund the trade?"

By leveraging buyer creditworthiness, trade cycles, and smart structuring, I help exporters:

- Fulfill orders without debt stress
- Maintain cash flow continuity
- Focus on growth instead of firefighting

Today, through **Ben Finserv**, I work as a **trade finance orchestrator**, not a lender.

I don't sell loans.

I don't push products.

I help exporters confidently say **YES** to global opportunities—without risking their business.

Business Model 2: (If Collaborated with Chandan Reddy)

International Trade Finance Structurer – Benedict F

(Ben Finserv)

(Orchestrator Model | Cross-Border Facilitation Driven)

1. Customer Segments (Refined – Ecosystem-Centric)

Primary

- Growth-stage Indian exporters (₹1–10 Cr turnover)
- Exporters operating on open account / partial advance terms

Secondary (Influencers & Multipliers)

- CFOs / Treasury Heads (cash-flow decision makers)
- Freight forwarders & logistics partners (execution gatekeepers)
- Trade consultants & CAs (advisory layer)

Ecosystem Stakeholders (Execution Layer)

- Banks, NBFCs, fintech lenders
- Export credit agencies

👉 Shift: From “clients” → **multi-stakeholder trade ecosystem**

2. Customer Problems (Expanded – Friction-Based View)

Not just finance problems—**cross-border friction problems**:

Cash Flow & Finance

- Working capital blocked between shipment and payment
- Limited access to structured, order-based funding

Execution Friction (Critical Insight from Guide)

- Documentation errors causing delays
- Compliance misalignment (NTMs, customs, certifications)
- Logistics inefficiencies increasing cost

Hidden Risks

- Buyer default / delayed payment
- FX exposure
- Loss of repeat orders due to execution failure

👉 Core Problem:

Exporters don't fail due to lack of orders,
they fail due to **friction across the trade cycle**

3. Value Proposition (Rewritten – Orchestrator Positioning)

“We structure and orchestrate export transactions—so orders move faster, get funded smarter, and execute without cash-flow stress.”

Value Creation

- Convert trade orders into **predictable execution cycles**
- Reduce **transaction friction (finance + compliance + logistics)**
- Align cash flow with real trade timelines

Value Delivery

- Buyer-led financing structures
- Compliance-first execution design
- Coordinated ecosystem (banks + logistics + documentation)

👉 Shift: From “getting finance” → **engineering trade execution**

4. Key Solutions (Integrated – Not Siloed)

Finance Layer

- Invoice-based export finance
- Pre & post-shipment funding
- Buyer-backed / structured trade finance

Execution Layer (NEW – from guide)

- Documentation structuring & validation
- Compliance alignment (HS codes, Incoterms, regulations)
- Logistics coordination (via partners)

Orchestration Layer (Core Differentiator)

- End-to-end deal structuring
- Stakeholder coordination
- Trade cycle synchronization

👉 Core Offering:

Finance + Compliance + Logistics = One structured flow
